DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 are drawn to a lacrosse head, classified in class 473, subclass 513.
- II. Claims 15 and 16 are, drawn to sockets, classified in class 473, subclass 505.
- III. Claims 17 and 18 are, drawn to lacrosse heads, classified in class 473, subclass 513.

Inventions I II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the lacrosse head could have a rough perimeter at the socket. The subcombination Group II has separate utility such as a socket for garden tools. The subcombination Group I has separate utility as a one piece lacrosse head and stick.

Art Unit: 3711

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to applicant's attorney P. Walker on August 9, 2005

to request an election to the above restriction requirement with a voice mail message to respond if applicant wished to discuss the restriction. At the time of this action, applicant's representative has not returned the examiner's phone message which resulted in this action being mailed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
